URL removal request totals

The graph below shows data on the percentages of URLs we have reviewed and processed. The figures on the right are based on the total number of requests received. These data date back to the launch of our official request process on May 29, 2014.

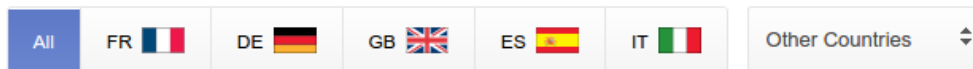

Total URLs that Google has evaluated for removal:

1,518,620 URLs

Total requests Google has received: **433,558 requests**

The graph reflects URLs that have been fully processed, while the figures above reflect the total evaluated. URLs that require more information or are pending review are not included in the graph.

They thought that search engines were a map of **what** people were thinking. But actually they were a map of **how** people were thinking. Impulse. Response. Fluid. Imperfect. Patterned. Chaotic.

Big Tech / Google /

Google now lets you download your entire web search history

By Myolisi Sikupela: Staff Reporter on 21 April, 2015

Google is letting users to download their **entire search history**.

Though this is virtual data, imagine it tangible, every last thing you have ever searched for on Google, years and years of searches and now collected into tangible data. This could rise into a small mountain, or if laid across a flat surface, stretch for miles. It is not only the amount of it but the contents of it. It is about what have you been searching for and what can it reveal about you as a person.

Users can download their entire search history, dating to when they first logged in with an account on any device. The search history page also offers more insight into one's search. It shows data on one's top clicks, top queries and top sites. Google stresses that this data is only available
