# Our vision - the world we wish to see.

A society based on self-determination, trust and cooperation which allows people to live to their full potential and to preserve ecosystems for all living beings.

# Our mission - the path to our vision.

We encourage relationships where people can share their time, skills and resources, unconditionally. Through these connections and communities we prevent waste and raise awareness for a sustainable way of living.

# Our primary objective - the first step on our path.

To create then launch the yunity platform which will first bring the foodsharing movement world-wide.

# Example of a sharing plattform – www.pumpipumpe.ch
